

First announcement:

**Trend workshop in Kühlungsborn, Germany  
19-23 September 2016**

This is the first announcement of the well established annual „trend workshop“ which takes place on 19-23 September 2016 in Kühlungsborn, the largest sea resort town in Germany.

The most important topics of this workshop are:

1. Observed trends and long term variations in the middle atmosphere
2. Modeled and predicted trends and long term variations in the middle atmosphere
3. Trends and long-term changes in the ionosphere and thermosphere
4. Dynamic, physical, chemical and radiative mechanisms of trends and long term variations
5. Role of the middle atmosphere for climate

The workshop is co-sponsored by IAGA, ICMA/IAMAS, the ROSMIC program of Varsity (SCOSTEP), and the German ROMIC research initiative of BMBF.

Some preliminary information is available at the following website:

[www.iap-kborn.de/1/trends2016](http://www.iap-kborn.de/1/trends2016)

Please sign in under „expression of interest“.

We plan to issue the 2nd announcement in March 2016 with more information, e. g. on travel support applications etc.

Franz-Josef Lübken

(Chairman of the local and science organizing committees)
